

Alabaster Funds Are Needed In. . .

Africa The Church of the Nazarene is growing so rapidly that the region is having difficulty constructing churches fast enough to accommodate church plants

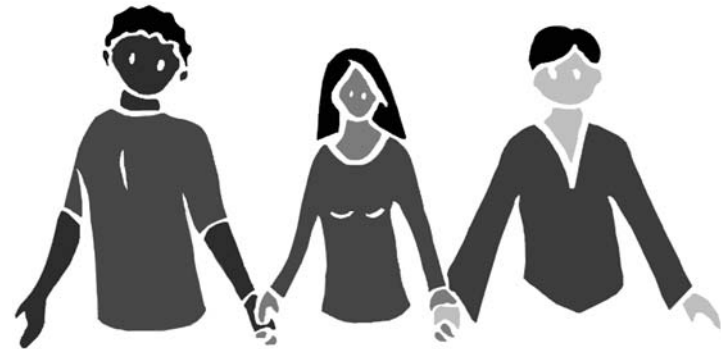

Fiji Churches were springing up so fast that the district superintendent organized boot camp training to quickly prepare new pastors for ministry. Buildings will be needed for these congregations.

The Middle East Increasing accessibility of the Internet is opening doors for World Mission Broadcast. Radio broadcasts can be sent into sensitive areas via the Internet. Alabaster funds will be needed to construct buildings when some of these areas allow entry.

Guatemala A church in Guatemala City outgrew the house in which they were meeting, and one of the members donated a greenhouse tent. Because the chapel was inexpensive and portable, the MAC Region began using these tents for temporary chapels until permanent buildings could be constructed. Alabaster funds will be needed to replace the temporary chapels.
